Fee Structure Under Review

A selected committee has been established by university president C. Brice Ratchford for the purpose of possible revision of the fee structure at the Universities of Missouri.

The committee, officially named the Fee Restructure Task Force, is comprised of members from all four campuses. The original goal was to formulate a set of recommendations by April 1st, 1976, and to be implemented by this coming fall. But these deadlines have been found to be beyond reach most probably a new fee structure would go into effect by the Fall of 1977.

The fee changes proposed are: a) a straight per hour charge; b) a flat rate plus so much per hour; c) different fees for each curriculum; and d) different fees for freshmen, sophomore, etc. The new adopted policy would be university wide.

Also under discussion was the abolishing certain "nuisance" fees such as add-drop charges, diploma charges, etc. Nothing definite was decided about these.

Further detailed information about the proposals can be obtained from your Student Council representative or Dean Paul Ponder. Any student input is welcomed.

Historical Comment By C.S.F.

Several years ago, an evaluation of the Administrative Offices on campus was made by several faculty committees. The results of the individual investigations were forwarded to a "Super-Committee" headed by Dr. Harry W. Weart, chairman of the Metallurgy and Nuclear Engineering Departments. Dr. Weart's committee then wrote a final report and submitted it to the Academic Council. This report, as presented to the Council, generally shocked and dismayed the group in attendance. This was because the report called for several new administrative positions, in particular, the post Vice-Chancellor. Much discussion followed the presentation and there was considerable grumbling. It should also be noted that this occurred in the early days of the Council, and there was some question as to what should be done with the report. Finally, it was grudgingly accepted in order to remove it from the status of a continuing item on the agenda. In no way did the acceptance of the report signify the support of the faculty for the proposed administrative position. This fact is pointed out because word went out when the Vice-Chancellorship post was filled

that it was because the faculty desired and endorsed it. This was and is not the case at all.

A few months ago, again at an Academic Council meeting, a member of the faculty arose to offer a resolution of accolade to the current Vice-Chancellor, lauding his many years of service. The motion was a surprise to those in attendance, and was hardly the type of motion which one could speak out against. The result is that the faculty, by inverse action, has been placed in the position of approving the proceedings.

The matter demands some clarification. This comment is not directed towards the merits or demerits of anyone, particularly Dr. Dudley Thompson. This Committee cannot judge his overall Administrative tenure. It can, however, point out that under his tenure the administrative structure has tripled in numbers, while the student population has remained essentially constant. The Administrative salary inequities, which have only recently been publicized, were largely concluded during his term of office. One cannot help wondering why the motion was foisted upon the faculty. What were the true motives? Was it

simply a move on the part of an individual or individuals to ingratiate themselves with an Administrator? Certainly there are many senior members of the faculty that deserve such mention, yet no one speaks for them.

Certainly it would not have been to Dr. Thompson's discredit had he been returned to the post of Dean of Faculties upon relinquishing the Acting-Chancellorship. The cost saving to the campus would have been at least \$40,000 per year.

It is said that the Vice-Chancellorship is necessary because the Chancellor is off-campus so much of the time. This Committee then asks, if the chancellor must travel so much, should he be called "Chancellor?"

In order to help the Administrators decide how the faculty truly feels on two vital issues, all faculty members are asked to respond to two questions. They should forward the response to the editor of the Miner. He, in turn, is asked to reveal the results of this straw vote at a later date.

1. Do you favor abolishment of the position of Vice-Chancellor?

2. Do you favor abolishment of all Assistant and Associate Dean positions?

Hopefully the answer will be a hearty YES to both questions!

Watch this column for additional comments by The Committee to Save the Faculty.

The MISSOURI MINER will be considering students for its major staff positions next year. In most positions available, experience will be a requirement. Students interested must attend a general meeting at the MINER office, Monday, March 29, at 8:00 p.m. At a later date interviews will be held before the UMR Board of Publications. If you have any questions please feel free to call Dan Shelledy (364-9885) Sunday or Monday next week.

TAU BETA PI INITIATION BANQUET

The Spring Initiation Banquet of Tau Beta Pi will be held in the T. Pat's Ballroom at 7:00 p.m. Sunday April 11, 1976. Tickets are \$5.00 and may be obtained from any pledge.

UMR TRAP AND SKEET CLUB

The Club invites all students that are interested in learning to safely shoot a shotgun, to attend any of their regularly scheduled practice sessions. Practice is held at the Rolla Trap and Skeet Range (J. T. Harris, owner) every Wednesday and Thursday afternoon from 3:30 p.m. until dark. There will be a tournament in both skeet and trap on Saturday, April 3. This tournament, will be held at the above mentioned range and is open to all UMR students. The best shooters of this tournament will represent UMR at the intercollegiate meets to be held this semester at Springfield and Columbia. There will be four divisions in each event with prizes for the winner and runnerup of each division. Make your plans to attend, participate and enjoy the competition of shooting and the thrill of being a winner. For more information such as, availability of guns, shells and general cost for practice, and tournament competition contact any regular member or Dr. Stevens, 304 Engineering Research Laboratory, 4481.

THEATRE GUILD

The UMR Theatre Guild will hold its next regular meeting on March 25, 1976, at 6:30 p.m. in Rm 101 of the Old Cafe. Everyone is welcome. Plans for our next production will be discussed.

CARTER REVARD TONIGHT

The Humanities Department presents Carter Revard in a reading of his poems, this afternoon at 4:00 p.m. in the M.E. Auditorium. Also tonight Mr. Revard will give a presentation on Twain and Indians at 7:30 p.m. in G-5 of the H-SS Bldg.

GS MEETING

The Graduate Students Association will have a meeting Monday, March 29 in Rm. 130 of the Physics Bldg. All are invited to attend.

Sophomores & Juniors

Make next summer's job the first step in a second career.

Two years from now, when you get your college degree, you can also get your commission as an Army officer.

It all starts with a job next summer. For 6 weeks at Fort Knox, Ky.

It's not exactly a job, however. It does pay you \$500 plus free room and board. You will work...work hard. And you can quit, anytime you wish, with no further obligation.

But it's more like a school. Where you'll pack your mind and body with 2 years' worth of leadership training...to prepare for your Army ROTC courses on campus next fall.

Then, while you study for your chosen degree, you also prepare for a responsible position in the active Army or Reserves. And get paid \$100-month (up to 10 mos.-yr.) during your last 2 years of college.

CAP Deals With Current Issues

Campus activities on population, sex education, availability of family planning, teenage sexuality, the status of women, and related issues are being supported by the Campus Action Program (CAP) of the Population Institute in Washington, D. C.

The program provides students with activity suggestions, planning assistance, resource materials, and in some cases, funds to cover project expenses. CAP includes projects aimed at population awareness and policy change on the campus and community level.

CAP currently deals with a broad range of issues: The interrelationships between population, food and the environment; development; prenatalism; sex education and counseling services; consumption of resources; life styles; and the status of women and fertility. The program encourages students to develop both projects topics and strategies beyond this list.

Special consideration will be given to funding requests from students who are doing action projects for college credit, for example, through independent study courses, since such students will have more time to devote to their projects. However, all requests for funding will be considered, on a year round basis.

CLIMBING CLUB

The MSM Climbing Club will be showing the National Geographic Film Americans on Everest. The account of the ascent of the world's highest mountain. This will be shown Thursday, Mar. 25 at 6:30 p.m. in 305 Norwood Hall. Open to the public.

INTERVARSITY CHRISTIAN FELLOWSHIP

There will be a special meeting sponsored by InterVarsity Christian Fellowship on the subject of self-supporting foreign missionary work. It will be held in the Meramec Room of the University Center, Thursday, March 25, at 7 p.m. All interested faculty and students are encouraged to attend.

TAU BETA PI WORKDAY

On Saturday, March 27, the UMR chapter of Tau Beta Pi, the national engineering honorary, is holding a work day. Tau Beta Pi's work day is being held to raise money for the chapter's Freshmen Scholarships that are awarded annually to deserving UMR freshmen. To support the work day, let Tau Beta Pi send a team of its members to your house to perform any job you choose. You pay what you like, whatever you think is appropriate. To secure a work crew for your job, simply call one of the phone numbers listed below. Your participation in this project will be greatly appreciated, especially by the eventual scholarship recipients.

Talent On Display

Attention all people who think that they can spot talent when they see it. Now is your chance to judge when you come to the Student Talent Coffeehouse on March 27 in the Snack Bar. This event, sponsored by the Student Union Board, gives you a chance to see some of the talents that your fellow students have from 8 - 12 p.m. There will be singing, acoustical guitarists and even a magician to display their skills for free. This great evening is available only to those who attend with a valid UMR-ID.

Aerospace Engineer To Talk On ICBM

Mr. Richard C. Siefert, a '74 alum of UMR, will be here this Wednesday, March 31, 1976 as a guest lecturer from the McDonnell-Douglas Corp. in St. Louis. The topic of his presentation will be the Tomahawk CURISE Missile System.

The "CRUISE" is a revolutionary Intercontinental Ballistic Missile (ICBM) characterized by its virtual 100 per cent accuracy. Currently, the CXURISE Missile is a formidable bargaining chip for the U. S. at the SALT talks. The presentation this Wed. will be directed towards an overall engineering point of view and should be interesting to any technical minded person.

Make sure to be at G-5, Hum-Soc Sci this Wed., March 31 at 7:30 p.m. Refreshments will be served and several "pitchers" (gift certificates) will be given away as door prizes. This lecture is sponsored by the student chapter of the American Academy of Mechanics.

Theatre Guild's U.S.A. To Be Presented

Next weekend, the UMR Theatre Guild, in commemoration of the Bicentennial of the United States of America,

under the auspices of the UMR Bicentennial Committee, will present "Ubiquitous Sam Arrives". The play, written by Professor George Luffel of the UMR Math Department, is a humorous look at life in the colonies during the

Revolutionary War. The play is being directed by Nicki Talbot and its main characters are being portrayed by Kathy Bryan, Stan Hadley, Karen Ketterer, Carl Lippitt, Andy Schelin, Morgan Slusher, and Patty Tanaka. The production will be presented Thursday, Friday, and Saturday, April 1, 2 and 3, 1976 at 8:00 p.m. in St. Pat's Ballroom. Admission is free.

Psychology Club Sponsors Panel

On March 26, 1976 the Missouri Association for Social Welfare and the UMR Psychology Club will sponsor a panel discussion "Is Effective Rehabilitation Possible in Missouri's Prisons?"

Panelmembers will include: Dr. J. Noel Heermance Corrections Chairman E.C. Division, MASW; Robert A. Hill Coordinator Corrections Task Force, MASW;

and two penal residents. An Open Discussion will be encouraged!! This project is funded by a grant through the Missouri Committee for the Humanities, the State based arm of the National Endowment for the Humanities. This discussion will be held in G-5 of the Humanities - Social Sciences Bldg. at 7:00 p.m. Everyone is encouraged to attend!

ROTC: There's Still Time

Junior college, community college graduates and UMR students completing their sophomore or junior years can become eligible for the advanced Army ROTC course by attending a special six-week program at Fort Knox, KY, it was announced this week by Colonel Robert E. Crowley, Professor of Military Science here at UMR.

Colonel Crowley explained that under current law, junior college students and others who have not taken the basic ROTC course in their freshman and sophomore years may qualify for advanced ROTC by attending the six-week course commencing May 28, June 11, or July 16. Those who complete the Advanced Course are commissioned as second lieutenants.

The cutoff date for male applicants is April 1.

Students taking the summer program will be paid approximately \$500.00 for the six weeks of training. In addition, while at camp they will receive free room and board and reimbursement for transportation to and from Fort Knox. If they successfully complete the accelerated summer program and are admitted to the Advanced Course, they will receive an allowance of \$100 a month. In all, a student who successfully completes the two years of the Advanced Course will have collected up to \$2,800 through ROTC.

At the basic camp, students receive instruction in military drill, tactics, history, weapons, communication and leadership techniques.

"The ROTC basic camp emphasizes leadership development and is designed to bring students to a level of military training and education which will qualify them for enrollment in the advanced course senior ROTC program," Colonel Crowley said. "Only students who have successfully completed either the basic course as well as most armed forces veterans, are eligible for the advanced course."

Those interested in enrolling for the summer program should call Colonel Crowley at (314) 341-4741 or write to him at the Army ROTC Department, University of Missouri-Rolla, Rolla, Missouri 65401. He will be interviewing prospective candidates for the summer program until April 1.

WHAT IS IT? Does anyone know (or can anyone guess) what is displayed in the above picture. If you do, drop off your idea at the MINER office, T-11. We will print the most original answers in next week's paper.

Damn Fool's Opinion

Can you believe this?

by S. D. Rucker

I can't. Have you heard the one about the Academic Council proposal to make finals in all classes mandatory this spring? Yeah, that's the one that was on the Student Council referendum we all saw (and took time to fill out!) a few weeks ago. The idea is, apparently, that in years past finals week at UMR has presented an unfair situation to many students because they had to stay longer than others. So, in order to create a fair situation across the board for all students and faculty, and to insure that we stay the full sixteen week semester which our catalogue advertises, the Academic Council is seriously considering a proposal which will keep all students and faculty members here throughout finals week!

The Academic Council is made up mostly of faculty, some student leaders and some administrators. Its purpose is, as you would suppose, to determine academic policy of the university, under which the case in point comes. Now I've never before outrightly condemned policies of the university administration in any of its facets before. I've always believed that at least people 'thought' they were doing the right thing even if I didn't agree with what they were doing. This time I must say, however, that the proposal herein being discussed should, if you will pardon the expression (and even if you won't), be deposited securely up the rectum of whoever thought it up. The fact that the voting on the proposal was tabled at the last meeting, to be brought up again at the next meeting, signifies that the Council is seriously considering such a proposal. I'll just bluntly say that if they have no better activities to occupy their time with than consideration of such an inane idea, then their usefulness to the running of this university should be earnestly weighed.

Anything you think about the idea, anyway you look at it, it has faults, and I could go on to considerable length; but just to examine the most blatant absurdities entailed in the proposal consider:

By virtue of the very fact that professors are human beings and that different students have different professors, often for the same course, the question of "fairness" in relation to the amount of work spent in class, topics covered, etc. can only be a relative thing. Some profs cover more in two-thirds of a semester than others cover in the whole time, some teach better than others, some are more likeable than others, etc; the whole educational process, because it concerns such a large amount of human interaction is a very subjective procedure. Making everyone stay here throughout finals week in an effort of "equalizing" or "making more fair" our educational process is like putting shoes on a snake. Rather futile. One person may have had an easy time of it throughout the semester compared to another simply because he had an easier professor. Will making them both stay for finals week make anything more fair? It'll probably only inconvenience them.

Also let us remember that the primary goal here is to learn and not to be concerned with how many days we put in. If a professor is convinced that he covered the material he originally set out to cover in a semester, and thinks the students' performances are effectively evaluated without need for a final, then so be it. That is his decision and his alone. It should not be taken out of his hands. The faculty members as a whole don't have nearly enough say in the running of this university anyway, let us not encroach anymore than we already have on the individual faculty-student relationship.

Earn an extra \$2,700 during your last 2 years of college.

Army ROTC can make the big difference in financing those last 2 college years. Here's the math of our program:

Basic Camp Training (6 weeks during summer between your Sophomore and Junior years)	\$481.74+
Advanced Course during your Junior year	900.00
Advanced Camp Training (6 weeks during summer between your Junior and Senior years)	443.97+
Advanced Course during your Senior Year	900.00
Total	\$2,725.71

+ You also receive travel allowances from your home to Basic and Advanced Camp training sites. While in camp, you get food, lodging, clothing and emergency medical care.

These amounts will vary according to length of school term.

You can earn \$100 per month for up to 10 months a year, but the average term is 9 months. In most instances, the total will exceed \$2,700.00.

Now, what about your commitment or obligation if you enroll in Advanced Army ROTC? First, you make no commitment when you attend the Basic Camp. This is the time you can discover first hand whether Army ROTC is your thing. And it gives us an opportunity to determine if you're good officer material. Frankly, the Basic Camp is rough; it's demanding both physically and mentally. So you have the option of quitting whenever you like. We'll even pay your transportation back home.

If you successfully complete the Basic Camp, you are eligible for enrollment in the Advanced Course. Then you make your commitment. That commitment includes an agreement to serve on active duty for 2 years. Or, (if the Army's needs are such) to enter active duty for 3 to 6 months and then serve for a time in the active Reserves. In either case, you'll earn the full pay and allowance of an officer.

Those are the basic facts. There are a number of programs which might interest you. Mail this coupon for facts about Army ROTC. Or, visit us so we can talk it over.

Your Army ROTC earning may not pay all your costs for those final 2 years. But they'll take a healthy bite out of the high cost of learning!

I'm a college sophomore or junior and am interested in your Basic Camp. Please rush information. No obligation on my part

Internships Available

Internships offering grants up to \$600 plus travel and research expenses are available from the Population Institute for students interested in working on population growth and environmental issues.

Students who participate in the Intern Program will work closely with state legislators

and agencies in researching and analyzing population-related issues, policies and legislation. While continuing to attend regular college or university courses, the intern will also spend part of each week (10-12 hours min.) with his/her sponsoring agency, meeting with other groups and individuals, doing needed

research and writing and making periodic trips to the state capital. Each intern will arrange for academic credit for the internship with a faculty advisor.

Generally, internships run from September through May or June, but summer programs in selected states will be available. The program outline

is flexible and alternative approaches to research of population policies will be considered. Project states will be selected in late spring on the basis of available placements. States currently under con-

sideration include: Ala., Ariz., Cal., Colo., Conn., Del., Fla., Ill., Ind., Iowa, Ky., Mass., Md., Minn., Maine, Miss., Mo., Mich., Neb., N.J., N.Y., N.C., Ohio, Pa. S.C., Tenn., Tex., Va., Vt., Wash., W. Va.

St. Pat's Concert how disgusting!

Dear Editor:

What's wrong with students today? Why can't they have just a little consideration for others? St. Pat's concert only brought me humiliation and disgust! It was impossible to enjoy oneself because of the enormous, aggressive crowd. Before the doors to the gym were opened, you found yourself swaying to and fro with no control over yourself because of the consistent, childish pushing. Later, as I was sitting on the gym floor, I was almost stomped to death by drunken miners, and others of the younger set, staggering from one end of the gym to the other in search of a place to sit. But as we all know, the gym was packed with wall to wall people and hardly no standing room at all. The next thing that really caught my eye was a Miner putting his cigarette out on the gym floor — for which there was absolutely no excuse for, considering the hundreds of McDonald's ash trays being passed out. At least he could've put it out on the sole of his shoe. I tried to get his attention to tell him what I thought about his nasty habit, but he was too numb to notice any action that I might have taken.

The pot at the concert was just as bad or worse than usual. I think alot of these pot-heads use concerts as an excuse to smoke in public and "show off". Can't they listen to music without getting high on something? If they want to smoke pot let them do it in the privacy of their own home, but why expose others to it? Remember, it is still illegal! If they would only learn to show a little more consideration in the future, I am sure that the concerts would be much more enjoyable for everyone. On the other hand, if all the smoking and uncontrollable drinking continues I believe that concerts should be omitted! Let's have some consideration and cooperation in the future Miners and friends!

Signed: A Miner Fan-
believe it or not.

KMNR programming 'popular format?'

KMNR
Box 203A
Mining Building
UMR

Dear Sirs:

There has been some controversy recently concerning KMNR's programming policy. The crux of the problem seems to be that the executive board wants to stick to a 'popular format,' playing so-called hard rock during prime time hours to try and build 'station image' and hold a regular audience. Some of the DJs want to play other kinds of music and are

being shifted to non-prime time slots.

The exec board would do well to realize that this is a university, and as such it is an intellectual community composed of people who are perfectly capable of understanding and appreciating many different kinds of music.

While it is true that you can capture a certain percentage of the listening audience by consistently playing one type of music, you will still only be appealing to a small portion of the total listening audience. Commercial radio stations are forced to play to a small, consistent audience in order to get any response to advertising messages. Some of the personnel at KMNR evidently think that is 'big time radio' and want to emulate this practice at KMNR in order to sound and feel professional.

One of the primary functions of the university environment is to expand our horizons of perception through exposure to new ideas and experiences. KMNR can be instrumental in this. You have the freedom from advertising restrictions to be something far and away superior to commercial radio. There is excellent music to be heard in jazz, country, rock, folk, bluegrass, progressive, and other disciplines. The world of music is practically boundless, to limit ourselves to listening to one small poart of it is a pitiful waste of opportunity. Instead of trying to get the DJs to stick to some popular format the exec board should be encouraging versatility and exploration of the entire musical spectrum. KMNR could become an exciting source of new and interesting musical experiences, instead of just

another dull radio station.

In conclusion: Get out of your rut, KMNR. Please do not insult your audience by assuming that we are as naive and narrowminded as you are.

Very sincerely yours,

Financially Speaking

Editor:

I find it quite hard to believe that Auxiliary Enterprises does not know exactly where they stand financially. If they are unaware of their exact position, financially, then it is about time we attained some new administrators. If they do know their situation, then the problems, or the proof of their nonexistence, should be published so that those of us investing have earned money to have these facilities, may be justly informed.

It seems to me as though Mr. Zink and Mr. Wollard are trying to skirt the heart of the matter, that being the figures involved. When well over 50 per cent of student funds are going for operating expenses, rather than bonds or direct services, then a severe problem exists. I would like to call for an explanation by Auxiliary Enterprises, to be printed in the Miner.

A Concerned Student

Coeds here's my number

Dear Editor:

I would like to reply to the authors of the letter appearing in the March 4 issue, asking that

Coeds be included in the male Miner's social plans.

I also did not have a date for St. Pat's, and I know I missed a great deal of the fun of the weekend. I would like very much to meet one or more Miner Coeds with whom I could socialize and-or date, but I have a problem which I think is common to many Miners. My opportunities for meeting Coeds are rare, since there are few in my department, or in the orgnaizations I belong to.

For this reason, I am sorry that you did not follow up your request with opportunity by signing your name, and perhaps your phone number. Just maybe there would have been two fewer datesless Miners for St. Pat's.

Perhaps you feel that a girl printing her phone number in a newspaper to get a date would be a bit much, and you're probably right. But guys can stil get away with a lot of things that girls can't. So, with a thought to the approaching Independents' Weekend and Greek Week, here's mine. Give me a call. It just might work out.

FOR SALE — 12-string Alvarez guitar. Model No. 5021. Six years old. Will take best offer. Call Paul Andrew at 364-9769.

Orr Leads Way To 13th Place Finish For Miner Swimmers

On Tuesday, March 16, Coach Bob Pease and his ten national qualifiers left the UMR campus for Springfield, Mass. to compete in the NCAA Division II Swimming Championships. When it was all over, the Miners had broken ten team records and finished thirteenth overall, equaling last years performance and totaling 35 points. In addition, three more Miner swimmers gained All-American status, despite the fact that the meet was much tougher this year with the presence of Chico State University and California State University of Los Angeles. Chico State moved in from the NCAA Division III to finish first and California State at Los Angeles finished eleventh after competing as a Division I school last year.

The Miners began the first day of scoring in the 500 yard freestyle. It was All-American Bill Orr who finished tenth and broke his own team record by over five seconds. On the same day last year Orr became an

All-American in the 200 yard individual medley by finishing sixth, but Orr's individual medley had not progressed as expected this year and Coach Pease wisely elected to enter him in the 500 freestyle. In the final event of the day, the Miners 400 yard medley relay team finished twelfth. It was here that freshmen Richard Erickson, Darrel Taylor, and Bradley Schrieber became All-Americans along with returning All-Americans Dana Witt and Bill Orr.

Co-captain Mike Norberg got the Miners on the scoring track during the second day of competition. Norberg finished tenth in the 400 yard individual medley and bettered his team record. Orr earned additional points for UMR with one of his best swims of the meet and finished fifth in the 200 yard freestyle.

The final day of scoring again featured Bill Orr and Mike Norberg. Norberg took sixth place in his specialty, the 200

yard butterfly. After qualifying fifth in the preliminaries and bettering his second place time of last year, Norberg was forced to "pull" to and disappointing sixth place because of a new injury sustained before the final heat. Once more Orr was impressive in the grueling 1650 yard freestyle. He ended up fourth by less than a second and again bettered his team mark from last year.

Other swimmers from UMR swam well at the national meet but failed to score. Randy Lubbert entered the 500 yard free and 1650 yard free along with Orr and swam to personal best times in each event. Darrel Taylor bettered his team mark in the 200 yard breaststroke and Richard Erickson grabbed both of the Miner backstroke records. Steve Brown, George Engel, and Mark Draper also performed well on relay teams which just failed to qualify.

Although the Miner swimmers failed to break into the top ten as they had hoped they can look back on a successful season.

The Miners ran away with the MIAA meet early in March and improved significantly in the remaining two weeks of the season. More importantly, next year looks even better. Orr and Norberg will be even tougher as seniors and the young Miners have gained valuable experience.

Miner Track Men Show Strong Start

Last weekend the UMR track team travelled to Memphis to participate in the Memphis State Invitational. This was the first outdoor meet of the season as well as one of the toughest.

The competition was very tough with such schools as Miss. State, Ark. State, and Ark. Univ. present. There were a total of twelve schools represented at the meet.

Rodney Bullock made an impressive showing in the 100 yard dash. Rodney completed the 100 yard dash with a time of 9.6. This broke the school record of 9.7 held by Sam Brown. This time qualified Rodney for nationals in the 100 yard dash. In addition to his fine performance in the 100 yard dash, Rodney took sixth place in the 220 yard dash with a time of 21.6. Also representing Rolla in the 220 yard dash was Roger Vessel who finished seventh with a time of 22.0. Another school record was set by Craig O'Dear in the high hurdles. Craig achieved a time of 13.96 which qualified him for nationals. The old school record was 14.2 seconds set in 1971 by Don Hemenover. In the shot put Jeff Buck finished fourth with a put of 47' 7 1/2". Ross Klie high jumped 6' 6" to receive sixth

place while also tying the UMR school record which he set last year.

With such a fine start UMR's 1976 outdoor track season should prove to be a very successful one. The next track meet is scheduled for this Saturday at Springfield between UMR, SWMS, and Westminster.

The UMR 1976 indoor track season consisted of 4 meets. The first meet was a quad meet with Kansas State of Pittsburg, Wichita State, SWMS, and UMR. Rolla placed 3rd overall with Wichita State first, Kansas State second, and SWMS 4th. The second meet of the season was also a quad this time with CMS, Highland Jr. College, Kansas City Jr. College, and UMR. The Miners fared better this time as they placed second behind CMS with Highland and Kansas City following respectively. The other two meets of the season were the All Mo. meet and the MIAA. There were no team points awarded in either of these meets.

During the season there were a total of five school records tied or broken. In the 60 yard dash Rodney Bullock tied the UMR school record with a time of 6.3 seconds. In the 300 yard dash Rodney set a new record with a time of 31.3 seconds. In the 60 yard high hurdles Craig O'Deere tied the school record with a time of 7.6 seconds. In the two mile run Dave Craycraft set a school record of 9:34.6. In the mile relay the team consisting of Rodney Bullock, Mike Lewis, Steve Townsell, and Roger Vessel, set a school record with a time of 3:25.0. The UMR track team did a fine job representing the school during their indoor season and undoubtedly will continue to do so in their outdoor season.

Intramural Bowling Completed; Softball Now Underway

Intramural softball is underway and upsets are coming left and right.

The Mates started it all off by defeating defending champions Sigma Nu 5-4 in a very close game. Mates also came out on top in a slugfest with Kappa Sig 18-12.

Tech Engine showed a lot of offensive power by ripping BSU 16-2 then trouncing Acacia 24-1.

Pi Kappa Alpha is going strong with a double win, one over FLA 13-5 and then destroyed Delta Sig 20-1. Sigma Pi is also going strong by defeating Campus Club 12-10 then coming on strong in the last inning to beat FLA 12-5.

Lambda Chi Alpha seems to be having their troubles by losing three games. They started it off by losing to MRHA 10-9, their luck continued bad when Tau Kappa Epsilon defeated them 8-4. Monday night Lambda Chi also lost to Phi Kappa Theta 13-12.

Kappa Alpha started out on the right track by trouncing GDI 17-1, but were upset by Wesley 12-7.

MRHA is playing on up and down cycle, after beating Lambda Chi, they lost to Beta Sig, 8-5, then came back to run over Pi Kappa Phi 14-3.

Beta Sig defeated Dorm II 7-0. Then Dorm II edged Pi Kappa Phi 5-4.

Pi Kappa Phi also came out on the short end against Sig Ep

16-0. Earlier in the week Sig Ep lost a 1 run game to AE Pi 4-3.

AE Pi was beaten rather soundly by Phi Kappa Theta 11-2.

Kappa Sig had a good week after they lost to the Mates, they beat TKE 15-12, then took a very close game from Triangle 2-1.

Triangle has had a rough week, besides their loss to Kappa Sig, they lost to Sig Nu 15-7, then lost a slugfest with Delta Tau Delta 40-39.

Acacia edged by GDI 10-9 only to lose the next night to Sig Tau 8-1.

Focus started out right by sliding by Campus Club 7-6, then came back to lose to FLA 6-0.

Rounding out the softball for the week Theta Xi trounced Delta Sig 13-1.

In women's intramural softball, Kappa Delta smashed by Zeta Tau Alpha 17-1.

AWS blanked Wesley 28-0, and WRHA earned a 1-0 forfeit from M-W-GDI.

The intramural bowling scores have not been picked up and tabulated by the intramural department.

Miner Rifle Team Best In State

With two matches remaining in its regular season, the UMR varsity rifle team remains the best college team in Missouri. Unbeaten by Missouri schools, the team will have attended eleven matches on a small budget of \$1300 per year. Considered to be one of the best non-scholarship teams in the Midwest, the team has amassed an 8 and 1 record so far this year. Wins are predicted in the two remaining matches against NEMO and Mo. Southern Univ.

The team, consisting of team captain Pat McCann, Mike May, Gary Mueller, Ruth Francis, Larry Harris and

freshmen Chris McCann, Dave Oakes, and Gary Shrewsbury, is coached by Master Sergeant Jerry Screeton, Sergeant Screeton's services are provided free of charge by ROTC.

Winning at Springfield, Mo., the Lincoln, Neb. "Big Red", the Lincoln Univ. Sectionals, and placing 4th out of 100 teams at the Booneville "Little Camp Perry" match, to name a few, the team has collected its record shooting against teams including UMC, SWMS, NEMO, Ohio State, Univ. Neb., Wisconsin, Minnesota, KSU, KU, and Texas Christian Univ.

Miners Open Season

The baseball season opened this past weekend for the UMR Miners, and the team did not do very well at all. They lost four games over the weekend, and only played well in one of those. About all you can say for the team is that it is still early in the season, things have to get better. The Miners do have quite a bit of talent on the team, and they should win some ball games this year.

Last Saturday the Miners played a doubleheader against Evangel College of Springfield, at Fort Leonard Wood. The Miner pitching was ineffective, and the defense was very porous, so Evangel had no problems in taking both games,

11-3, and 8-2.

On Sunday the team was in Columbia battling the MU Tigers, in another doubleheader. In the first game, the Miners played very well, and led until MU scored two runs in the bottom of the seventh inning to pull out a 4-3 win. The second game was little more than batting practice for the Tigers, as they romped to 14-0 win.

This weekend the Miners will be playing in Cape Girardeau against Southeast, and they should be able to win a couple of games down there, so I can write a good baseball story next week.

FOOSBALL AND GAMES AT 1107 PINE

Enroll in our
Summer school. It makes
up for the past 2 years!

If you missed the first 2 years of Army ROTC, you can complete all the work by taking our 6-week Basic Camp. It crams all you missed into a tough, concentrated course.

You'll earn over \$500 plus travel allowance and we furnish food, clothing and lodging.

What are your obligations? Frankly, none. You can quit any time. Or, we can send you packing. But over 90 percent completed last year's camp. So it must have a lot going for it.

When you return to college, you are eligible for Advanced Army ROTC. You earn a commission while you earn your degree. And get \$100 a month while you're taking the course.

The Basic Camp is open to men and women who have completed their sophomore year. It'll be challenging summer you're not likely to forget.
